

SP300 / SP500 Mini-Magnum

Clean, reliable, portable Solar Powered

500W Portable Solar Generator

- durable, compact, lightweight design
- high-power handling ability (300 or 500 watt)
- Built-in 120V receptacles with replaceable fuse
- Built-in 12V fluorescent light in rear of unit
- Built-in solar charge controller with indicators
- Comes complete with AC charger and 30W solar panel with 50' of cable. Optional solar briefcase available. (see bottom photo)
- Built-in, maintenance free battery
- LED battery charge indicators
- Emergency "car boost" feature

Battery Charging options :

1. AC adapter charging (provided)
2. Solar Panel charging

Place solar panel outdoors facing in southerly direction. Plug the power line of the solar panels into the "SOLAR CHARGE" socket.

3. For longer back-up time, you can connect an external battery via the supplied cables.

Please observe proper polarity: connect red line with positive pole of battery, and black line with negative.

Applications:

Suitable for resistive loads such as lighting, TV's computers, fans etc.

Not recommended for capacitive loads such as microwaves, refrigerators, motors etc.
